

PROFILE:

Responsible and detail-oriented Software Engineer with Full Stack and Web3 experience. Eager to gain hands-on experience and passionate about learning and growth.

EXPERIENCE

GTM & SWE • HapeCorp Present • Remote

- Supported engineering efforts on blockchain and Web3 projects, developing full-stack solutions including REST APIs from scratch using Node.js for authentication, data retrieval, and blockchain interactions. Collaborated across teams to deliver multi-chain solutions, wallet integrations, and backend services, enhancing platform functionalities through API integrations and interactive UI components.

EDUCATION QUALIFICATION

Bachelor of Technology BTech, Computer Science • PP SAVANI UNIVERSITY Mar 2025

SOFT SKILL

General Skills: Communication Skills, Problem-solving Abilities, Teamwork, Analytical thinking, Solidity, JavaScript, Python, Next, Vue, React, Express, Node, TypeScript

Soft Skills: Communication Skills, Problem-solving Abilities, Teamwork, Analytical thinking

Programming Languages: Solidity, JavaScript, Python

Frameworks: Next, Vue, React, Express, Node

PROJECTS:

CREA-CV EXPRESS

- Developed a full-stack website using React and Firestore to deliver a responsive user experience.

LUMI DEX

- Built a decentralized crypto exchange on EVM, focusing on security and efficient transaction handling.

AVATAR BOT

- Researched and developed a chatbot with an interactive avatar using Python and Unity, emphasizing AI-driven conversation, 3D modeling, and animation to create an engaging user experience.

Milk Rush

- Developed an InfoFi project leveraging multiple APIs to analyze social media posts. Implemented OAuth and Discord authentication, and integrated Three.js for an interactive user interface.

Umi

- Helped in building a multichain automation tool to streamline blockchain operations and enhance efficiency.

NFT Staking platform

- Built NFT staking platform including smart contracts, frontend, and backend development.

NFT Launchpad

- Created an NFT launchpad platform including backend services, wallet integrations, and API development to support minting and staking features.

Token Dropper

- Developed a token dropper tool enabling batch ERC-20 token transfers to multiple wallets efficiently using batch transfer methods.

LANGUAGES:

English (Fluent), Hindi (Native)
